

APPLICATION FOR TECHNICAL ASSISTANCE TO DEVELOP A BIOPRODUCT LABEL

The tool promotes opportunities to add value to products, sub-products and waste from the agricultural industry, creating a new production chain.

Secretaría de Agricultura,
Ganadería y Pesca

Ministerio de Economía
Argentina

Who can apply for assistance?

All countries in need of advice to generate a label that promotes the development of biomaterials and/or bio-based products and bio-inputs made from renewable raw materials from agro-industrial activity.

What is the purpose of technical assistance?

-  Promote entrepreneurship and research projects that are developing bio-based products in the country.
-  Promote innovation and sustainability in the production of these products.
-  Promote opportunities to add value to products, sub-products and waste from the agricultural industry, creating a new production chain.
-  Collaborate in the development of a label for bio-based products such as biomaterials and/or bio-inputs..
-  Establish mechanisms for the exchange of knowledge and experience with other countries.
